

New Construction / Renovation
Estimated 12 - 18 months

PHASE - I

From inception to tableware - we've got you.

Discovering your Unique Style

To create a beautiful + functional home that is uniquely YOURS we help you discover, define + develop your style.

Architectural Review + Revision

Designers think a little differently from architects + builders - so its crucial we review plans to weigh-in on aspects that could improve interior flow, functionality and aesthetics.

Door/Window Selection + Hardware

Door profile, mullion type, glass selection, special features, hardware style - many decisions go into the finish + function.

Plumbing + Electrical Fixtures

Plumbing + Electrical rough-in's occur during framing - so although decorative fixtures are installed later - their unseen corresponding valves and boxes will be set inside walls, floors + ceilings -- necessitating selection early on.

Appliance Selection

Appliances influence cabinet design - so items for kitchen, laundry, etc. need to be chosen prior to cabinet planning.

Cabinet Design

Once we know what appliances and fixtures we want to fit into the space we can design beautiful cabinetry to compliment selections in both form and function.

Hard Surface Selection

Flooring, tile and countertops. Depending on complexity of design - detailed elevations or diagrams will be needed to convey designs to tradespeople with clarity.

Paint Finishes + Wall Coverings

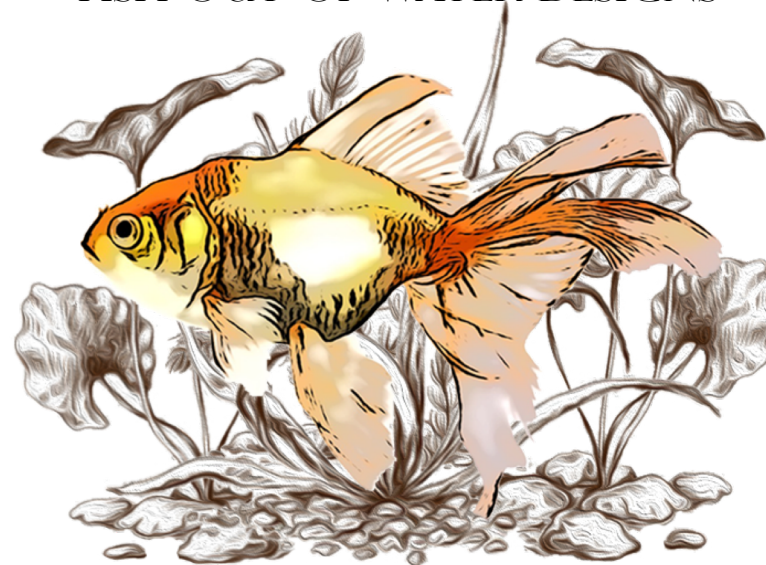

As framing advances - we can start to get an idea of natural light patterns in the interior and start the discussion of paint colors, finishes + wall coverings. Color, sheen and installation application instructions will be given to sub-contractors.

Construction Management

Its one thing to make selections - its a whole other thing to make sure they are installed + implemented correctly! We monitor the process, make site visits, provide clarity to sub-contractors + do everything in our power to ensure the design vision comes to fruition as intended.

Decor + Interior Furnishings

PHASE - II

From inception to tableware - we've got you.

Space Planning + Floor Plans

How do you live and move in your home? What are your patterns, practices + preferences for living? We answer those questions together + then implement a plan that best promotes each.

Anchor Furniture Customization

We start by designing the largest, most used or important pieces to build a room around (sofas, club chairs, etc).

Accent Furniture, Rugs, Art + Accessories

Next - the furniture pieces that compliment the larger staples are chosen - and all the items that pull it together, giving rooms color, texture or theme.

Window Treatments + Soft Furnishings

Windows provide another layer of decor and functionality - providing light control and privacy. Soft furnishings work in tandem to provide individualized comfort and accents.

Mood Boards + Tear Sheets

These documents provide visuals of items together so you can see the total, cohesive character of a room design + the dimensions, details of each component.

Work Orders, Invoicing, Ordering

At this stage documentation + communication is key. Clients **sign off** on orders and custom ordered goods. It is crucial both parties review orders carefully.

Shipping, Receiving + WG Delivery

Not glamorous + arduous - but OH SO important! All our hard work is moot - if the correct items don't show up in good condition, made accurately and unpacked + assembled carefully so they can be enjoyed!

Styling + Goods on Approval

The final touches that "finish" a project - hand towels, cutlery, throws, cutting boards, plants, etc. The things that make it feel complete and ready for life!

Live Happily Ever After!
